

# A BLESSING TO OUR LIVES

## CORNEISHA

I first learned about Families Helping Families of GNO at Children's Hospital. I went to the Parent Resource Center to get some information for my daughter. Ms. Thuy worked there as a liaison for FHF and told me about the organization and added me to their email list to learn about different things they have going on in the community.

My daughter, Corneisha, is 8 years old and has arthrogryposis and developmental delay. The information and support I received from FHF has changed our lives. I learned about ABA services and lots of other things, and FHF has been there to help us every step of the way.

I am still learning how to be an awesome advocate for my daughter. I started a nonprofit organization called Corneisha Miracle Worker Foundation to help spread awareness and to tell others about her journey. In September of 2021, she started walking at 8 years old!

Families Helping Families has been a big blessing in our lives, and I always tell other parents about FHF. I learned that we are our kids' first and best advocates, and if we see something that's not right we need to get answers. I am thankful for FHF being a part of our community and helping others because they have helped me a lot.
